PERSONAL STATEMENT | CAREER OBJECTIVE

Software developer with 3 years of experience creating full-stack web applications using React and Python (Django). Experience in designing scalable APIs, developing user-focused interfaces, and delivering complete solutions, including a fully developed product platform built independently within a 1-month delivery cycle. Strong ability to adapt quickly and work throughout the entire development cycle. Passionate about building efficient, data-driven applications and continuously learning new technologies.

EDUCATION

2012 – 2016	Information Systems Bachelor
Core Modules:	Database, Software Engineering, Web Development, Data Structures
Final result:	Completed

WORK HISTORY

- | | |
|----------------------------|--|
| Sep 2024 – Oct 2024 | Freelance Full Stack Developer |
| Company: | CLUB GVS (Featured Project) |
| Duties: | <ul style="list-style-type: none">Designed and developed a gamified referral and rewards platform using React (frontend) and Django (backend), delivered end-to-end in 1 month;Implemented a points-based reward system and leaderboard to increase user retention and platform competitiveness;Created role-based access control (RBAC) for designers, architects, partner companies, and administrators;Built advanced filtering and search system and implemented secure authentication with session management;Managed full product lifecycle: requirements gathering, architecture design, development, testing, and deployment. |
-
- | | |
|----------------------------|---|
| Jan 2022 - Jul 2024 | Software Developer |
| Company: | FPF TECH |
| Duties: | <ul style="list-style-type: none">Developed and maintained full-stack web applications using React, Angular TypeScript, and Django, C#, Postgres, Docker, Kubernetes, working autonomously on features and improvements;Worked on a Customer Data Platform (CDP) for Positivo Brasil, collecting user behavior data for marketing analysis and personalized campaigns;Optimized data architecture, reducing response time by 30% and improving query performance for marketing teams; |

- Used **Elasticsearch and Kibana** for data analysis and visualization, identifying user usage patterns;
- Developed and maintained **REST APIs** with **Django REST Framework**;
- Led the **refactoring of a critical legacy frontend**, improving scalability, performance, and reducing bugs;
- Worked with **AWS, Docker, and Terraform** for infrastructure automation and deployment;
- Collaborated in an **Agile (Kanban)** environment using **Azure DevOps Boards**;
- Developed the CallHome system – a monitoring and **predictive diagnostic** application for devices using **C#** (Windows/Linux);
- Created an **automated installer with Inno Setup** and implemented **hardware/OS telemetry** collection (CPU, memory, disk);
- Designed a **predictive fault detection system** that automated technical support tickets, reducing response time and enabling preventive maintenance.
-

KEY SKILLS

- Languages: **Portuguese** – Native | **English** - B2 | **Spanish** – Elementary;
- **Soft skills:** Problem-solving, autonomy, adaptability, team collaboration, agile methodologies (Kanban)
- **Hard skills:** Full-stack development (React, Angular, Django, C#), REST APIs, data architecture, predictive diagnostics, user behavior tracking
- **IT Skills:** React, Angular, TypeScript, JavaScript, HTML, CSS, Python (Django, Flask), C# (.NET), PHP, Django REST Framework, PostgreSQL, MySQL, Elasticsearch, Kibana, AWS, Docker, Terraform, Git/GitHub, Azure DevOps, Inno Setup

TRAINING & ADDITIONAL INFORMATION

- **Angular 19** – Complete Course from Beginner to Advanced (Udemy, 2026)
- **Claude** – Domine Cowork, Claude Code, Skills e Plugins (Udemy, 2025)
- **AWS Cloud Technical Essentials** (Udemy, 2025)
- **AWS Cloud Essentials** (Coursera, 2025)
- **Machine Learning e Data Science com Python de A a Z** (Udemy, 2024)
- **React.js Ninja Course: React + Webpack Module** (Udemy, 2023)
- **Complete Guide to Elasticsearch** (Udemy, 2022)
- **Design Patterns with Python** (Udemy, 2021)
- **Git and GitHub Essentials for Developers** (Udemy, 2021)
- **Database and SQL Language with PostgreSQL** (Udemy, 2021)

ADDITIONAL INFORMATION

- Delivered a full-stack gamified platform independently within a 1-month delivery cycle, from requirements to deployment.
- Reduced data processing response time by 30% through optimization of CDP architecture.

- Led refactoring of a critical legacy frontend, improving scalability and reducing bugs over several months.
- Designed a predictive fault detection system that automated technical support tickets, reducing downtime risk.
